PROPOSED CHANGES TO AGENT WEEKLY SUCCESS ROADMAP

How to Read This Document

For each section, you'll see:

- **CURRENT** — What exists in your booklet today
- **PROPOSED REPLACEMENT** — What I'd replace it with, based on the 10-platform research
- **WHY** — The reasoning behind the change

CHANGE 1: Cover Page — Source Attribution

CURRENT (Page 1)

> *Synthesized from: Tom Ferry Coaching • Mike Ferry Organization • Buffini & Company • Gary Keller / The ONE Thing • Industry Best Practices*

PROPOSED REPLACEMENT

> *Synthesized from: Tom Ferry Coaching • Mike Ferry Organization • Buffini & Company • Keller Williams MAPS/BOLD • Icenhower Coaching & Consulting • YesMasters (Kevin Ward) • Steve Shull Performance Coaching • Dale Archdekin / Smart Sales Coaching • SkySlope Ayce • MaverickRE*

WHY

The current booklet draws from 4 coaching sources. The new research covers 10 — adding 6 platforms that contribute unique frameworks (tactical empathy, LPMAMA, PPO/API objection handling, AI coaching, NLP techniques, and data-driven conversion benchmarks). Credibility and depth increase significantly.

CHANGE 2: Foundation Page — Coach Summaries (Page 2)

CURRENT

Four coach profiles: Tom Ferry, Mike Ferry, Buffini & Company, Gary Keller / The ONE Thing

PROPOSED REPLACEMENT

Expand to 8 coach profiles (4 existing + 4 new). Keep Tom Ferry, Mike Ferry, Buffini, and Gary Keller as-is. Add:

Coach	Summary
Icenhower Coaching (ICC)	Data-driven systems: the 1-3-5 Business Plan, 40-Touch SOI plan with a proven 7:1 return ratio, and conversion metrics by skill level. Coaches have each sold 1,000+ units. Avg client results: 39% GCI increase, 110 homes/year.
YesMasters (Kevin Ward)	Scripts mastery meets NLP. Author of The Book of YES (27 field-tested scripts). "Golden Hours" prospecting 8 AM-12 PM daily. 7 Domains of life balance. "Pros train based on commitment. Amateurs train when they feel like it."
Steve Shull Performance Coaching	Tactical empathy from FBI negotiator Chris Voss. The "Favorite or Fool" pre-listing framework. Full Fee Agent philosophy — charge full commission, willing to walk away. CRM as a "relationship engine," not a filing cabinet. Anti-hustle: clients report working 15 hrs/week at high six figures.
Dale Archdekin / Smart Sales Coaching	The lead conversion specialist. UNSCRIPTED sales method with PPO (Perspective/Process/Outcome) and API (Acknowledge/Paraphrase/Inquire) frameworks. Speed-to-lead: contact within 5 minutes. Built a team from 100 to 650 transactions.

WHY

The current 4 profiles cover prospecting-heavy (Mike Ferry), referral-based (Buffini), balanced (Tom Ferry), and systems-focused (Keller) approaches. But they miss: tactical empathy communication (Shull), structured objection handling (Archdekin), scripts mastery with NLP (Ward), and data-driven accountability (ICC). These 4 additions round out every major coaching philosophy in the industry.

SkySlope Ayce and MaverickRE are omitted from the profiles since they're AI tools, not coaching philosophies — but they'll appear in the Technology Stack section.

CHANGE 3: Universal Success Laws (Page 3)

CURRENT

8 Principles: Prospect First | Listings Are Leverage | Consistency Beats Intensity | Accountability Changes Behavior | Delegate Everything Else | Measure Leading Indicators | Trust Outlasts Every Transaction | Work-Life Balance Is a System

PROPOSED REPLACEMENT

Keep all 8 current principles. **Add 2 new ones** (making it 10 Universal Laws):

New Law	Description	Source
9. Speed to Lead Wins	New leads must be contacted within 5 minutes. You are 400% more likely to convert in the first 5 minutes than at the 30-minute mark. Every minute of delay costs you money.	Dale Archdekin, MaverickRE, ICC
10. Master Communication, Not Just Scripts	Scripts are starting points, not crutches. True mastery means internalizing tactical empathy — mirroring, labeling emotions, and asking questions that make clients feel deeply understood. The agent who listens best wins the listing.	Steve Shull / Chris Voss, Dale Archdekin, Kevin Ward

WHY

Speed-to-lead is one of the highest-impact findings from the research — it's backed by hard data and directly actionable. The communication mastery law addresses a gap: your booklet mentions scripts but doesn't differentiate between reading a script and truly mastering conversational frameworks. Shull, Archdekin, and Ward all teach this distinction.

CHANGE 4: Add Lead Categorization System (NEW — Insert After Page 3)

CURRENT

No lead categorization system exists in the booklet. The Referral Partner Tiering (A/B/C) on pages 15-16 covers professional partners, but there's no system for categorizing and prioritizing actual leads/prospects.

PROPOSED ADDITION — New Page: "The Lead Priority System"

Category	Definition	Follow-Up Cadence	Action
HOT (A)	Ready to buy/sell within 30 days. Has motivation, timeline, and financial ability.	Every 1-3 days	Priority #1 every morning. Call first. Set appointment immediately.
WARM (B)	Planning to move in 30-90 days. Interested but not urgent.	Every 7-14 days	Consistent nurture. Provide value (CMAs, market updates). Stay top of mind.
COOL (C)	Planning to move in 3-12 months. Early stage.	Every 14-30 days	Monthly check-in. Add to email drip and market update list.
NURTURE	Had a conversation but no clear timeline. Not ready yet.	Every 14-30 days	Multi-channel touches: call + text + email. Provide value without pressure.
SOI / DATABASE	Past clients, sphere of influence, personal contacts.	33-40 touches/year	The long game. Calls, notes, pop-bys, events, mailers per 33-Touch plan.
DEAD	Will not transact. Wrong number. Hostile. No potential.	Remove from pipeline	Delete or archive. Don't waste time. Keep your CRM clean.

The Speed-to-Lead Rule:

- New online leads: Contact within **5 minutes**
- Days 1-7 after first contact: **Intensive multi-channel outreach** (call + text + email)
- Average prospects need **7-12 touchpoints** before converting

- Most agents give up after 3-4 attempts — that's where the opportunity is

WHY

Every lead is not equal, but the current booklet treats all prospecting the same. This system (drawn from ICC, Dale Archdekin, and MaverickRE) gives agents a clear framework for prioritizing their time. The speed-to-lead data is one of the most impactful findings from the research — and it's completely absent from the current booklet.

CHANGE 5: Morning Ritual Enhancement (Page 15)

CURRENT (6 Steps)

1. Move Your Body (6:00 AM, 20-30 min)
2. Gratitude & Mindset (6:30 AM, 10-15 min)
3. Review Goals (6:45 AM, 5-10 min)
4. CRM Review (7:00 AM, 20-30 min)
5. Script Practice (7:30 AM, 20-30 min)
6. Call List Ready (8:30 AM, 15 min)

PROPOSED REPLACEMENT (8 Steps)

Step	Time	Activity	Detail	Source
1	5:30 AM	**Wake + Hydrate**	Same time every day. 16-20 oz water. No phone, no email, no news, no social media.	Mike Ferry, MaverickRE
2	5:45 AM	**Silence & Mindfulness**	10-15 min meditation, prayer, or deep breathing. Start the day centered, not reactive.	Steve Shull, Tom Ferry, Buffini
3	6:00 AM	**Affirmations & Visualization**	Speak affirmations in present tense. Visualize your top 3 goals as already achieved. See yourself winning the listing.	Tom Ferry, Mike Ferry, Kevin Ward
4	6:10 AM	**Exercise**	30-40 minutes. Non-negotiable. "A 30-minute workout multiplies the effectiveness of every hour that follows."	All coaches
5	6:50 AM	**Personal Development**	Read 10-20 pages. Or listen to a coaching podcast during commute. Feed your mind before you feed your pipeline.	Tom Ferry, Buffini
6	7:10 AM	**Journaling + Daily Plan**	Write 3 gratitudes. Review schedule. Write top 3 priorities. Connect today's actions to annual goals.	Tom Ferry, Buffini, KW
7	7:30 AM	**CRM Review**	Work dashboard toward zero. Review today's tasks, milestones, and pipeline. Know who to call and why.	Steve Shull, ICC
8	8:00 AM	**Script Practice**	20-30 min role-play with a partner. Practice today's call type (expireds, FSBOs, SOI). Record yourself weekly.	Mike Ferry, Kevin Ward

WHY

Three key additions: (1) **Hydrate + media-free wake-up** — Mike Ferry is adamant about no TV/radio/news/email before prospecting. This protects mindset. (2) **Mindfulness as a separate step** — Steve Shull makes this foundational, not optional. Meditation and gratitude journaling are currently combined in your booklet; separating them gives each proper weight. (3) **Earlier start time** — shifting from 6:00 to 5:30 AM creates space for all 8 steps without rushing, and ensures agents are call-ready by 9:00 AM with proper preparation.

CHANGE 6: Add Pre-Listing System (NEW — Insert Before Tuesday Deep Dive)

CURRENT

Tuesday's schedule includes "Listing Appointment Prep" (pull CMAs, review property details, prepare pricing strategy) and afternoon listing appointments. But there's no structured pre-qualification or pre-listing framework.

PROPOSED ADDITION — New Section: "The Pre-Listing System"

Before you ever walk into a listing appointment, complete these steps:

Step	Action	Detail	Source
1	**Pre-Qualification Call**	15-30 min phone call to uncover motivation, timeline, decision process, pricing expectations, and who else they're interviewing.	Mike Ferry, Steve Shull
2	**"Favorite or Fool" Assessment**	Ask: "Why did you call me specifically?" If they mention a referral or your reputation — you're the Favorite. If they found your sign or Googled "agents near me" — you might be the Fool. Only go on appointments where you're the Favorite.	Steve Shull
3	**LPMAMA Qualification**	Confirm: Location (where), Price (expectations), Motivation (why selling), Agent (working with anyone?), Mortgage (payoff/equity), Appointment (commitment to meet).	MaverickRE
4	**Send Pre-Listing Packet**	Mail or deliver before the appointment: CMA with comps, seller net sheet, your marketing plan, client testimonials/reviews, personal introduction video (60-90 sec), and pre-completed listing agreement.	Kevin Ward (Shock & Awe), Mike Ferry
5	**The Listing Presentation**	Lead with curiosity, not credentials. Use tactical empathy: mirror their words, label their emotions ("It sounds like timing is really important to you"), and center the conversation on their goals. Present your marketing plan with proof points. Close with the pre-completed contract.	Steve Shull, Tom Ferry, Mike Ferry
6	**Full Fee Standard**	Present your commission with confidence. Do not preemptively discount. If they push back, use the accusations audit: "You're probably thinking that's higher than you expected..." Be willing to walk away. Agents who hold firm earn 15-30% more annually.	Steve Shull (Full Fee Agent)

WHY

This is arguably the single highest-impact addition. Your booklet covers *when* to do listing appointments but not *how* to systematically win them. The "Favorite or Fool" framework alone could save agents dozens of wasted hours per year on appointments they were never going to win. The Shock & Awe packet and LPMAMA framework are proven conversion tools from Kevin Ward and MaverickRE respectively.

CHANGE 7: Add Objection Handling Frameworks (NEW — Insert as Reference Page)

CURRENT

The booklet mentions "Handle objections" on Tuesday's listing appointments (page 7: "We want to interview other agents") and "Prepare for 3 most common objections" (page 10), but provides no actual framework for handling objections.

PROPOSED ADDITION — New Page: "Objection Handling Frameworks"

Framework 1: Dale Archdekin's PPO Method

When a prospect raises an objection, they're revealing their **plan** — and you're not in it. Don't fight the objection. Understand it.

Step	Action	Example
Perspective	Understand their past experience and beliefs	"It sounds like your last experience with an agent wasn't great."
Process	Discover their plan for handling the situation	"What's your plan if the home doesn't sell on its own?"
Outcome	Identify the unique result they're hoping for	"What would the ideal outcome look like for you?"

Framework 2: Dale Archdekin's API Response Method

Step	Action	Example
Acknowledge	Let them know you heard them	"I completely understand that."
Paraphrase	Restate what they said — no spin, no leading	"So you're saying you'd like to try selling on your own first before hiring an agent."
Inquire	Ask deeper questions about their perspective, process, and outcome	"What made you decide to go that route? What happens if it doesn't work out in 30 days?"

Framework 3: Steve Shull's Tactical Empathy Techniques (from Chris Voss)

Technique	What It Is	Example
Mirroring	Repeat the last 1-3 words they said, with a questioning tone	Seller: "We just don't think now is the right time." You: "Not the right time?"
Labeling	Name the emotion you sense	"It sounds like you're frustrated with how long the process took last time."
Accusations Audit	Preemptively voice every negative thing they might be thinking	"You're probably thinking: here comes another agent who's going to overpromise and underdeliver. You might even be wondering if any of this is worth your time."

WHY

Objection handling is where deals are won or lost, and your booklet currently has zero frameworks for it. These three systems (PPO, API, Tactical Empathy) give agents a toolkit they can apply to any objection — commission pushback, "we want to think about it," "we're interviewing other agents," FSBO resistance, expired seller frustration. This is the most-requested training topic across all 10 coaching platforms.

CHANGE 8: Thursday Prospecting — Add In-Person Block

CURRENT (Thursday 9:00-11:00 AM)

Sphere & Pop-By Outreach: Execute pop-bys, call open house visitors, call 5-8 sphere contacts, send referral thank-you notes.

PROPOSED REPLACEMENT (Thursday 9:00-11:30 AM)

Split Thursday's protected window into two parts:

9:00-10:30 AM — Phone Prospecting

Priority	Activity	Target
1	Expired & FSBO calls	5-8 calls
2	Circle prospecting around active listings	8-10 calls
3	Past client check-in calls	5-8 calls

10:30 AM-12:00 PM — In-Person Prospecting & Pop-Bys

Activity	Detail	Source
Door-knock 5 expired/FSBO homes	Visit owner-occupied properties in your core market. Combine calling with door-knocking for maximum effectiveness.	Kevin Ward, Mike Ferry
Deliver 3-5 pop-bys	Small seasonal gift + referral reminder tag to A/A+ contacts. Keep to 5-10 minutes. If not home, leave on doorstep with handwritten note.	Buffini
Drop by local businesses	Thank referral partners; leave business cards and a value piece.	Buffini
Preview 2-3 properties	Know your inventory cold. Builds credibility with both buyers and sellers.	ICC

WHY

Your current Thursday already includes pop-bys and sphere outreach, which is great. The enhancement adds **door-knocking as a dedicated activity** — Kevin Ward and Mike Ferry

both emphasize that combining calling with in-person visits dramatically increases conversion. Mike Ferry prescribes visiting 5 expireds and 5 FSBOs at their doors daily. Adding a dedicated in-person block on Thursday (the "feet on the street" day) makes this actionable without disrupting the other days.

CHANGE 9: KPI Scorecard — Add Conversion Metrics (Pages 17-19)

CURRENT

The scorecard tracks: dials, conversations, FSBOs/expireds contacted, circle calls, past client calls, pop-bys, listing appointments, listings taken, buyer consultations, offers written, closings, handwritten notes, referrals, reviews, social posts, video content, GCI, savings, and training. Very comprehensive.

PROPOSED ADDITION

Add a **Conversion Ratios** section to the scorecard:

Conversion Point	Your Number	Benchmark (Beginner)	Benchmark (Expert)	Source
Contacts to Appointments	___%	3-5%	7-14%	ICC, Tom Ferry
Appointments to Listings Taken	___%	60%	80%+	KW MAPS, Mike Ferry
Listings Taken to Sold	___%	65%	80%+	KW MAPS, Mike Ferry
Buyer Consults to Agreements	___%	65%	80%+	KW MAPS
List Price to Sale Price Ratio	___%	95%	98%+	Already in booklet
Speed to Lead (avg response time)	___ min	Under 30 min	Under 5 min	Archdekin, MaverickRE
Online Lead to Appointment	___%	Varies by source	Track per source	MaverickRE

Also add:

New KPI	Target	Source
CRM dashboard at zero daily	Yes/No daily	Steve Shull
Database contacts on 90-day cadence	100%	Steve Shull, Mike Ferry
Percentage of business from repeat/referral	Track monthly (goal: 60%+)	Shull, Buffini

WHY

Your current scorecard tracks inputs (dials, contacts) and outputs (closings, GCI) excellently. But it's missing the **conversion ratios between stages** — which is where agents identify their specific bottleneck. An agent making 100 calls but setting zero appointments has a script problem. An agent setting appointments but not winning listings has a presentation problem. Without conversion ratios, you can't diagnose where the funnel is leaking. ICC and MaverickRE both emphasize this as critical.

CHANGE 10: Technology Stack — Add AI Tools (Page 21)

CURRENT

CRM: Follow Up Boss, KW Command, Top Producer, Sierra Interactive Video: BombBomb, Loom, Vidyard, iPhone Lead Gen: REDX/Vulcan7, Canva, Mailchimp/Constant Contact, Google Business Profile Coaching: Tom Ferry, Mike Ferry, Buffini, KW MAPS

PROPOSED REPLACEMENT

Keep all current tools. Add a new row:

Category	Tools
AI Coaching & Practice	MaverickRE (AI call grading + 60+ role-play personas), SkySlope Ayce (goal-to-task AI coach), ChatGPT/Claude (script drafting, market analysis, content creation)
AI Lead Management	MaverickRE Pro Dispatch (intelligent lead routing), Ylopo (AI-powered lead gen + nurture)
Transaction Management	SkySlope (digital transaction management, e-signatures, compliance)

WHY

AI coaching tools are a major 2026 trend. MaverickRE's AI call grading analyzes every call on 20+ data points and provides objective feedback — something a human coach can only do in scheduled sessions. SkySlope Ayce reverse-engineers income goals into personalized daily tasks. These aren't replacements for human coaching — they're force multipliers that provide daily accountability between coaching calls.

CHANGE 11: Goal Reverse-Engineering Formula (NEW — Insert in Annual Foundation Section)

CURRENT (Page 20)

The Annual Foundation section asks good questions ("How many listings will I take? What is my GCI target?") but doesn't provide the math to reverse-engineer those goals into daily activity.

PROPOSED ADDITION

The Daily Activity Calculator

```
STEP 1: Annual GCI Goal                              $____________

STEP 2: Average Commission Per Transaction            $____________

STEP 3: Transactions Needed (Step 1 / Step 2)          ____________

STEP 4: Your Close Rate (listings to sold)              ____________%
         Listings Needed (Step 3 / Step 4)              ____________

STEP 5: Your Appt-to-Listing Rate                      ____________%
         Appointments Needed (answer / Step 5)          ____________

STEP 6: Your Contact-to-Appointment Rate                ____________%
         Total Contacts Needed (answer / Step 6)        ____________

STEP 7: Working Days Per Year                           250

STEP 8: YOUR DAILY CONTACT TARGET (Step 6 / 250)       ____________
```

Worked Example ($250,000 GCI target):

- $250,000 / $7,000 avg commission = 36 transactions
- 36 / 75% close rate = 48 listings needed
- 48 / 70% appt-to-listing rate = 69 appointments needed
- 69 / 5% contact-to-appt rate = 1,380 contacts/year
- 1,380 / 250 working days = **~6 quality contacts per day (minimum)**

Note: The 5% rate assumes warm/SOI contacts. Cold calling runs 1-3%. Most coaches recommend 20-25 daily contacts to account for mixed quality and build pipeline momentum.

WHY

This is the single most universal framework across all 10 coaching platforms. Tom Ferry, Mike Ferry, KW MAPS, and ICC all use some version of it. Your booklet asks agents to set goals but doesn't show them the math that connects "I want to earn $250K" to "I need to make 20 calls today." This formula makes the abstract concrete and the daily activity feel purposeful rather than arbitrary.

SUMMARY OF ALL PROPOSED CHANGES

#	Change	Type	Impact
1	Source attribution — 4 coaches to 10	Update	Credibility
2	Coach profiles — add ICC, Ward, Shull, Archdekin	Add 4 profiles	Foundation
3	Universal Laws — add Speed-to-Lead + Communication Mastery	Add 2 laws	Philosophy
4	Lead Categorization System	New page	High — daily prioritization
5	Morning Ritual — expand to 8 steps, start at 5:30 AM	Enhance	Moderate
6	Pre-Listing System (Favorite/Fool, LPMAMA, Shock & Awe)	New section	**Very High** — listing conversion
7	Objection Handling Frameworks (PPO, API, Tactical Empathy)	New page	**Very High** — skill development
8	Thursday — add dedicated door-knocking block	Enhance	Moderate
9	KPI Scorecard — add conversion ratios + benchmarks	Enhance	High — diagnostics
10	Technology Stack — add AI tools	Update	Forward-looking
11	Goal Reverse-Engineering Formula	New section	**Very High** — connects goals to daily action

Total: 6 enhancements to existing content + 5 net-new sections

The existing booklet's structure, daily themes, and visual design remain intact. These changes layer in the best insights from the 6 additional coaching platforms without disrupting what already works.
